Strategic Partnership Signed Between Saudi Binladin Group and MultiVision Media Production to Document the Jeddah Tower Project .

MultiVision Media Production

INTRODUCTION

MultiVision is a leading media production partner, committed to helping organizations express their identity and strengthen their presence through compelling visual storytelling. With years of experience in the industry, we specialize in producing **corporate promotional and documentary films and construction reports** that capture the essence of each moment and elevate brand perception.

In recent years, **MultiVision** has evolved with the market, providing **creative, customized production solutions** designed to meet the dynamic needs of clients across various sectors.

CONSTRUCTION REPORTS TO THE NEXT LEVEL !

We take project documentation to the next level by integrating advanced technology, high-resolution visuals, and in-depth analysis.

Our reports provide precise, real-time insights that enhance communication, improve efficiency, and support informed decision-making.

From progress tracking to compliance documentation, we ensure every detail is captured with clarity and accuracy, empowering teams to drive projects forward with confidence.

SERVICES

Time Lapse

- Project Progress Reports.

Drone

- Aerial Photography.
- Aerial Videography.
- Aerial Timelapse.
- Aerial 360 VR.
- Aerial Laser Scanning (soon).

360 VR

- Internal / External Virtual Tours.
- Indoor Virtual Tours.
- Civil Laser Scanning (soon).

Photograph

- Project Process Photography.

- Landscape Photography.

Videography

- Project Progress Report.
- Projects Documentary's.

AI TIMELAPSE

Its a revolutionary fully wireless smart timelapse camera with a panoramic view of 220°. It captures the view in every moment and makes stunning timelapse videos. It can capture startlingly high-resolution (4K Ultra HD) time-lapses.

The system has wifi of 4g LTE, a solar panel and battery that provide you with a secured and stable data transmission, a min interval of 5 minutes that completely captures time-lapse, and so on. It is the best choice for professional photographers to create beautiful time-lapse.

Specification's :

- Ultra wide Panoramic View 220°
- Wifi or 4G LTE connection
- Built-in solar panel and battery
- Built-in battery works up to 7 days
- Min. Interval : 30 seconds
- Full HD, 4K, 6K
- Live video and photo snapshot
- MicroSD file backup

INSTALLATION

We offer a comprehensive process that includes the foundation and installation of cameras in optimal locations, along with the provision of fully trained engineers.

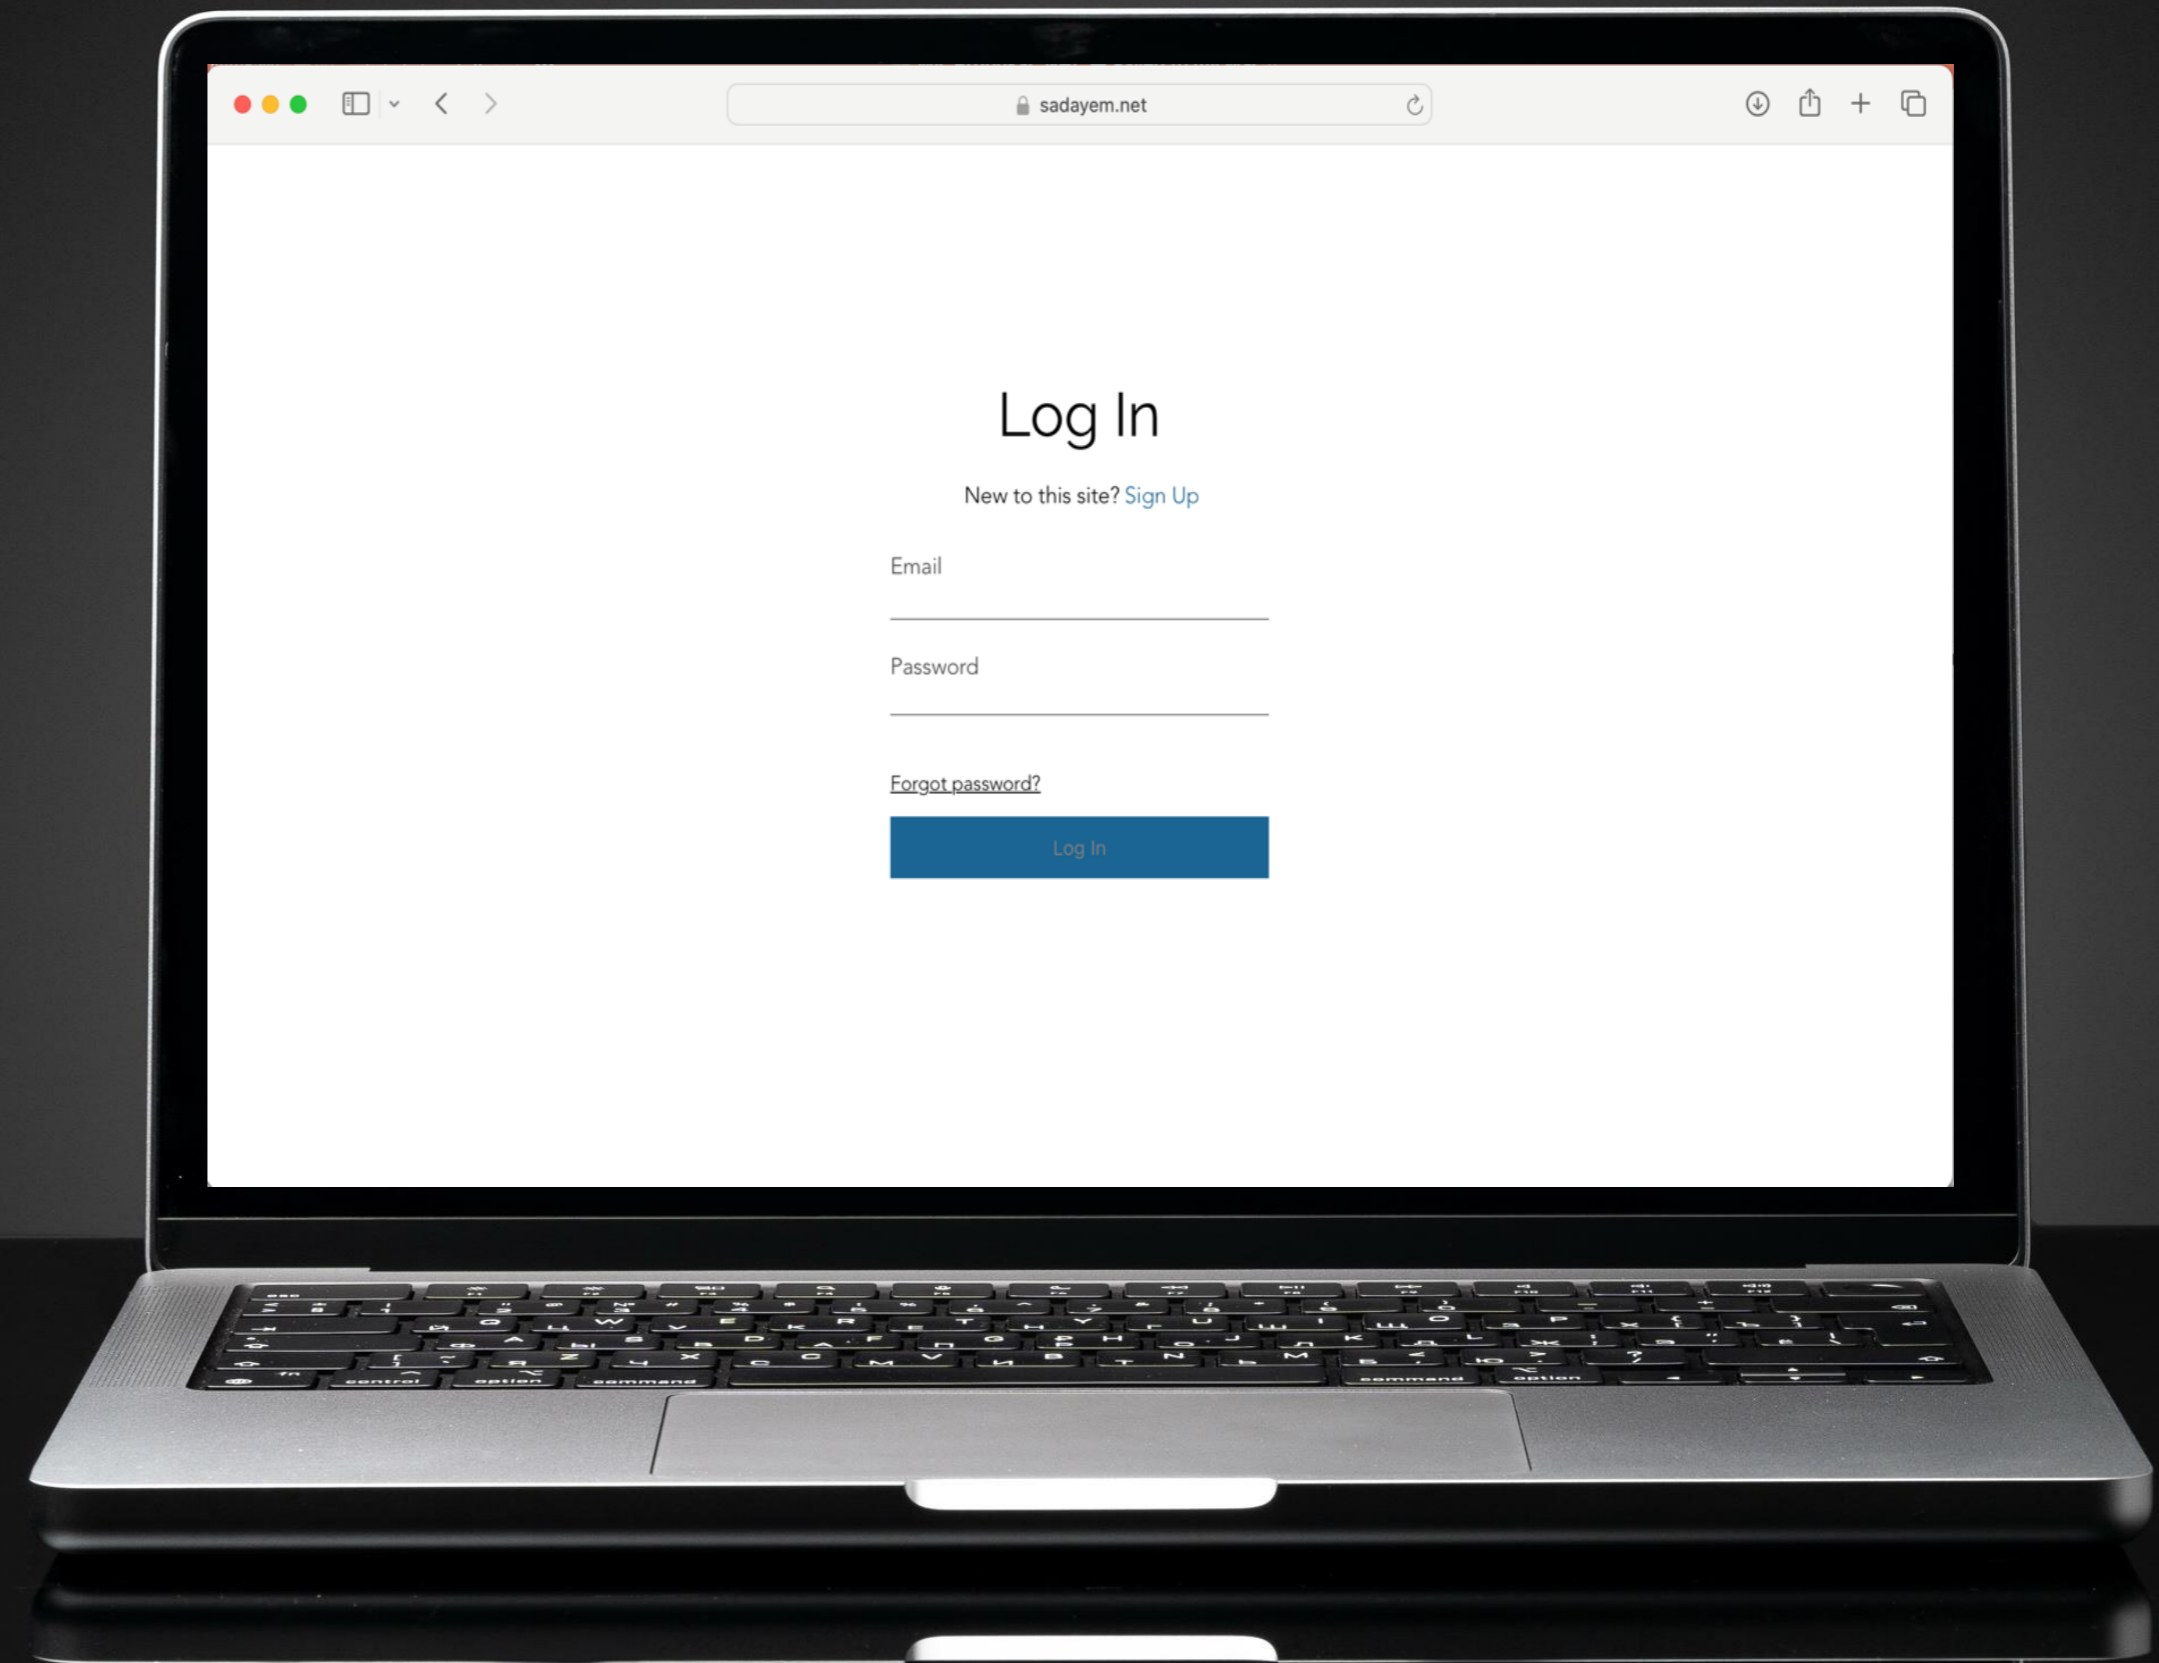

THE DASHBOARD

Web page base with the project name domain.

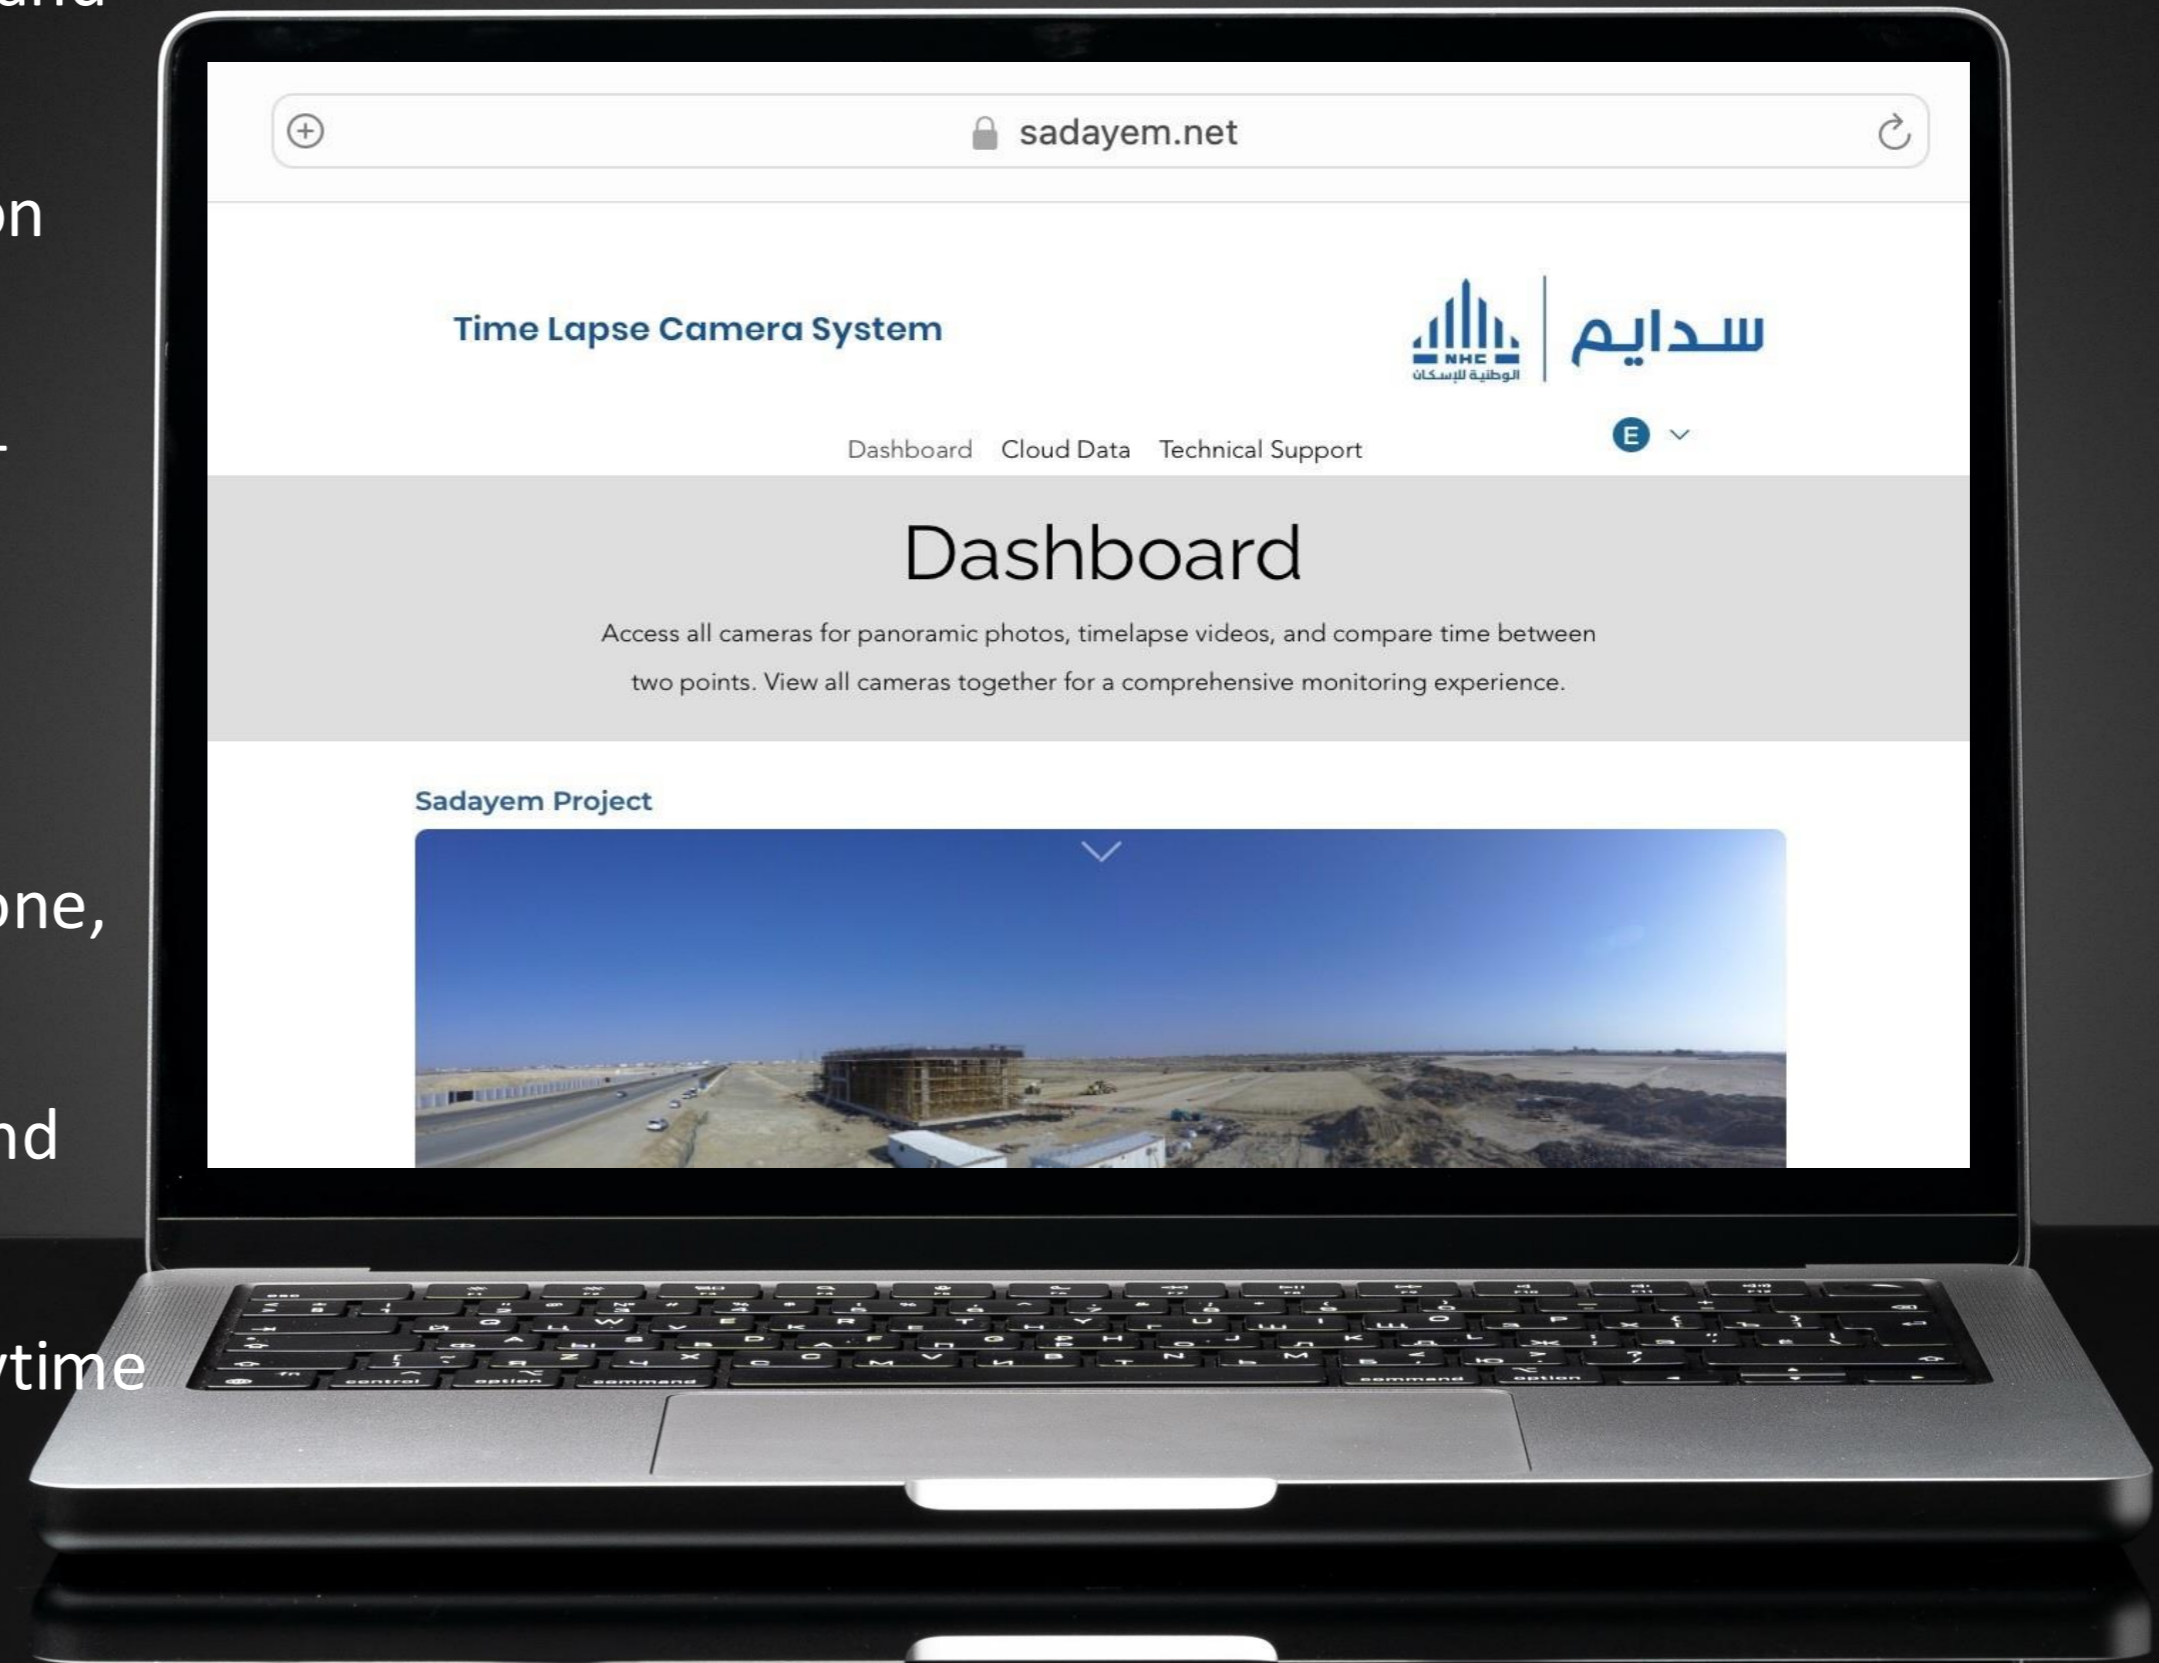

Example : www.jtptlc.com

The project is locked for safety and tracking whom visiting the platform, manual approval needed for each registration .

Project Camera Dashboard Key Features :

- Live Feeds & Recordings: View real-time video and access all camera footage instantly.
- Before/After Comparison: Compare any location point across two different times.
- Time-Lapse Export: Generate on-demand time-lapse videos from each camera.
- User Access Control: Manage permissions and allow downloads based on user roles.
- Cloud Integration: Access all on-site media (drone, video, edits) via SharePoint.
- Location Monitoring: Track camera locations and view the latest captured photos.
- 24/7 Support: Request technical assistance anytime through the dashboard.

DASHBOARD SAMPLE

MEDIA SERVICES

We offer high-quality video coverage of your construction project, capturing progress from both interior and exterior angles. Our team documents each stage with attention to key milestones and architectural details.

For aerial shots, we use a DJI drone to provide a unique, sweeping view of the site and its surroundings.

After filming, our editors will produce a 2–5 minute video complete with background music designed to engage and impress. The final product is perfect for showcasing progress to stakeholders and promoting your project's quality and scale.

With extensive experience in construction videography, we ensure every video is both professional and visually impactful.

360 VIRTUAL REALITY

MultiVision offers cutting-edge 360° Virtual Reality (VR) solutions tailored for construction projects and real estate developments. Our immersive VR experiences allow clients, stakeholders, and potential buyers to explore spaces as if they're physically there no matter where they are.

Our Services Include:

360° Virtual Tours

Immersive internal / external walkthroughs of construction sites or finished properties for clients and stakeholders accessible via VR headsets or online platforms.

Before & After VR Comparisons

View site progress at different stages in full 360° for clear, impactful updates.

Laser Scanning to Revit (Scan to BIM)

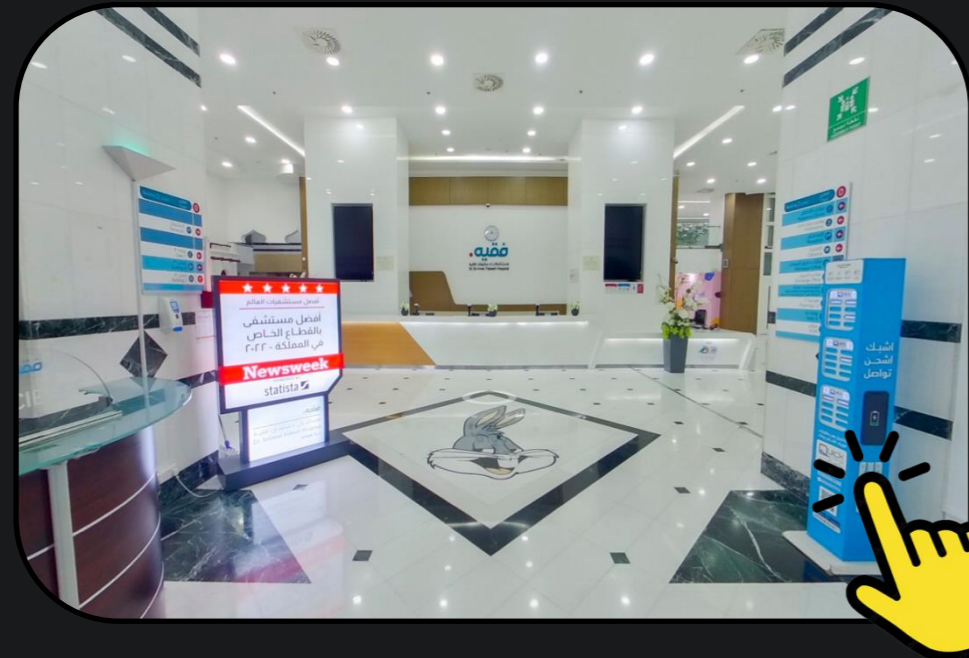

High-precision 3D laser scanning of existing structures, converted into Revit models for accurate as-built documentation and BIM integration.

Interactive Presentations

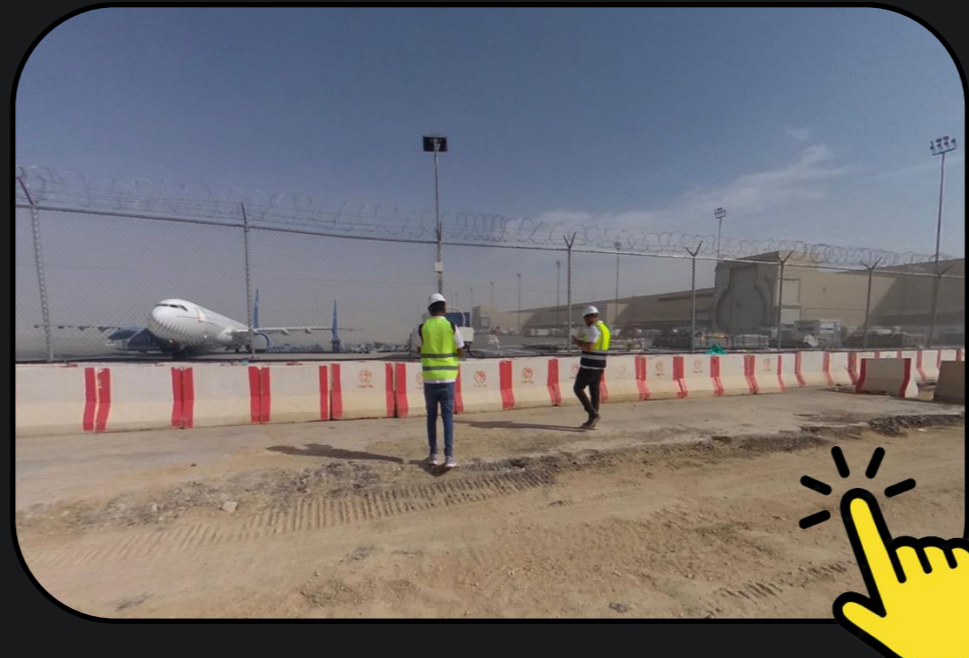

Showcase projects with dynamic visuals ideal for sales, investor pitches, or progress reports.
